

5.7 RULES IARU REGION I SEPTEMBER ATV CONTEST

5.7.1 Goal

5.7.1.1 Stimulation of ATV activity by organising a yearly international ATV contest.

5.7.2 Terms and Definitions

5.7.2.1 ATV contest: competition of licensed or receive-only ATV stations in a certain period of time, on each UHF/Microwave band on which ATV transmissions are allowed, using the mode(s) authorised for that band. The distance between stations that make contacts on several bands define the number of earned points.

5.7.2.2 Repeater: a public (amateur) service that (re)transmits received signals that are intended to be received by more than one person.

5.7.2.3 Station: any person (or group of persons using one callsign) within IARU Region I that is (are) able to transmit and/or receive Amateur Television signals from their own location or remotely, without being a repeater. No more than one transmitter may be in use at the same time.

5.7.2.4 Rover station: any station that is not fixed to one location that moves at least a minimum of five kilometres. Every time location is changed the moving station should be considered as a new station with the same callsign. Therefore, a new logsheet and four digit code should be used by the moving station.

5.7.2.5 Four digit code: four random chosen digits. The digits shall neither be the same (e.g. 2222) nor consecutive (e.g. 4567 or 5432).

5.7.2.6 Contact: contacts are considered to be valid when a four digit code that is transmitted by an other ATV station is received. Contacts made via repeaters or transponders are not considered as a contact.

5.7.2.7 IARU locator: the six, eight or ten digits that are related to the longitude and latitude coordinates of the actual position of the antenna's that are used during the contact.

5.7.2.8 Vision report: the internationally recognized codes P0 to P5:

	Analogue	Digital
P0	No picture perceived	No picture perceived
P1	Synchronisation with very little picture contents	Only occasional blocks visible
P2	Only large images (callsign etc.) perceivable	Sufficient blocks to read callsigns
P3	Picture noisy but some detail resolved	Some blocking
P4	Picture slightly noisy but with good detail and resolution	Occasional blocking
P5	Noise-free picture	Solid picture

5.7.2.9 Logsheet:

A logsheet has a format not smaller than A4, containing all information that is needed to judge the made contacts and claimed points.

It consist of a standard cover sheet and data sheets for every individual band (annex A).

I) A standard cover sheet: containing the essential information required to judge the contest entry. The following information should be submitted:

- name and address of the (first) operator,
- station call sign,
- IARU Locator,
- bands used, with the transmitted four-digit code group used for each band
- claimed score for each band.

The coversheet should show the signature of the (first) operator certifying the correctness of the log(s) submitted. In case of digital delivery of the log, typed name is the alternative of the signature.

II) Data sheets for every individual band containing the following columns in the order named:

- date,
- time in UTC,
- callsign of the station worked/seen,
- report sent: P# report followed by serial number,
- report received: P# followed by serial number,
- (seen) four digit code,
- IARU Locator received,

- number of points claimed.

It is strongly recommended to use the Excel sheet that is developed especially for this purpose (Annex A).

5.7.3 Responsibilities

- 5.7.3.1 Contestants: operate within the letter and spirit of the contest and in accordance with their licences of their country. Stations operating under special high power licenses do so "hors concours". Completion and delivery of the entry.
- 5.7.3.2 National ATV manager, VHF manager or the National Contest Committee: judge logs in time, send the results within four weeks after the contest to the IARU ATV manager.
- 5.7.3.3 IARU ATV contest manager: organise, judge logs in time, issue results within six weeks after the contest.

5.7.4 Contest

- 5.7.4.1 Date of contest.

The contest will be held in the second full weekend in June.

- 5.7.4.2 Duration of the contest.

The contest will commence at 1200 UTC on the Saturday and will end at 1800 UTC on the Sunday. It is recommended that the national societies will run their ATV contests at the same time as the IARU Region 1 ATV contest takes place.

- 5.7.4.3 Contacts.

For contest scoring purposes a participating station may be worked or viewed only once on each band. A roving station is considered as a new station, every time it has changed location.

- 5.7.4.4 Contest exchanges.

The following information shall be exchanged during a contact:

- I) - Four digit code

For each band used a transmitting station shall transmit the four digit code that shall not change throughout the contest.

For roving stations that changed location: both transmissions should be verified by new four digit code. For new contacts with stations that were logged before; the roving station should request the involved stations to transmit a new four digit code and mention those digits as remarks in their logsheet.

THIS FOUR DIGIT CODE SHALL BE EXCHANGED IN VIDEO ONLY AND SHALL NOT BE TRANSMITTED BY ANY OTHER MODE THAN VISION.

- II) - Call sign,

- Vision report,

- IARU Locator (the location of the receiving or transmitting antenna's do define the location of the station),

- Contact serial number, starting with 001 on each band used and increasing by one for each successive contact on that band starting from one for the new logsheet in use by roving stations),

- Vision report.

- 5.7.4.5 Scoring.

A two-way exchange of the four-digit code group by vision together with the exchange of the other information shall score:

- for contacts on the 435 MHz band : 2 points/kilometre
- for contacts on the 1.3 GHz band : 4 points/kilometre
- for contacts on higher bands : 10 points/kilometre

If only one station received the four-digit code group, and the other information was exchanged, the scores for *both* stations shall be reduced by 50%.

Note: for scoring purposes all valid contacts shall be deemed to have taken place over a distance of at least 5 kilometres, even if the two stations in contact have the same or adjacent IARU Locators.

- 5.7.4.6 Entries.

The entries must be set out on completed log sheets.

A copy of the logs must be sent to the national ATV Manager, VHF Manager or the national Contest Committee, not later than the third Monday following the contest weekend. The submission of the logs implies that the entrant accepts these contest rules.

5.7.4.7 Judging of entries.

The judging of the entries shall be the responsibility of the organising society, whose decision shall be final. Entrants deliberately contravening any of these rules or flagrantly disregarding the IARU Region I bandplans shall be disqualified. Minor errors may result in loss of points. The claimed contact will be disqualified for an obviously wrongly stated Locator, callsign, codenumber, or a time error of more than 10 minutes.

5.7.4.8 Awards.

The winner on each band and the overall leading station shall receive a certificate. The organising society may also send certificates to all entrants if they so wish.
