Action Points Vienna 2007

The 2007 Vienna Meeting was a preparatory event for the 2008 IARU conference at Cavtat. Please refer to Newsletter 45 and review the action points. Please finalise your action points and/or support those OMs that have offered their active co-operation.

2008 IARU Conference, to be held at Cavtat (Croatia), 14. - 22. November

Time flies, and I expect a large number of documents to be discussed at Cavtat. In addition to newly presented documents, some documents from the Vienna 2007 meeting will require a follow-up.

Please make sure you don't miss the following deadline:

Deadlines for all papers: 15. March 2008

Upon receipt of these papers, they will be processed and submitted to the Secretariat for distribution to the member societies.

IARU Contests

The project to evaluate IARU contests online is continuing. We found, however, that the EDI file formats generated by the various contest programs are anything but unified, and do not match the defined EDI file format. This problem will take some work, and we must convince the software developers that the file formats must be strictly adhered to, so that the further processing can be automated. We will keep you posted about the results of our efforts.
