## Friedrichshafen 2015

Thanks to the hospitality of DARC we had the opportunity to organize an open informal meeting about VHF/UHF and  $\mu$ Wave matters. There were about 32 attendees from at least 11 member societies. After a small introduction about how of the IARU-R1 (see [http://www.iaru-r1.org/images/IARU\\_FDH.pdf](http://www.iaru-r1.org/images/IARU_FDH.pdf)) there as an open discussion, main highlights:

### New radio project

Mike, OE3MZC, presented this project. It is a joint initiative of the ÖVSV, DARC and other IARU R1 Member societies to strengthen to the experimental character of amateur radio service by matching devices through dialogue with industry leaders in future. After our meeting Mike presented this to the three main Japanese manufactures of Ham equipment at the ÖVSV booth. You can find more information on: [http://ham-dmr.nl/?wpfb\\_dl=170](http://ham-dmr.nl/?wpfb_dl=170)

### Other topics

Hans, PB2T, gave us an update about the proposals for WRC 2019 about the harmonization of the 6m band. We discussed also other bandplan issues (2.3 GHz, satellite etc.). One of the conclusions was that we need to be innovative in using our bands (new techniques, such as new radio, digital modes, digital ATV,...).

I hope this can inspire member societies to make contributions for our meeting in Vienna.

There was a proposal to give the awards and certificates for the VHF/UHF/ SHF IARU contests during the HamRadio. We will make a survey about the way to organize this and the amount of certificates that will be requested. In the upcoming weeks you will get the opportunity to give your opinion about this.

## Use of the IARU R1 C5 Wiki

This Wiki can be a good tool for discussing and preparing our meeting in Vienna. Some of us have problems to log on, or forgot their password. Please write a mail to [ON4AVJ@uba.be](mailto:ON4AVJ@uba.be), I will help you to solve the problems with the wiki.
